

2022-2023

WELCOME

ONE SEMESTRE IN POLAND

Presentation by
Makhanbetzhan Laura

MY PRINCIPLE OF LIFE AND STUDY

Pure Gold has a process of going through the heat of fire before it becomes a valuable metal.

my first European countries

**Holidays that I
celebrated**

**first day in Poland
and university**

I'm studying international relations and the first lesson shocked me. The lesson is divided into 90 minutes without a break. At that moment we discussed culture and modernization. On the first day, I was given the task to talk about my country and make a beautiful presentation. All students dressed in national clothes and talked about national traditions.

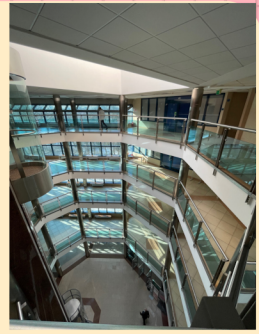

I lived on the 9th floor in a dormitory.
every day when I open my eyes there is
such a beautiful view

I am very happy with
both universities
because they gave me
the opportunity to learn
and gain experience.
The University of Lodz
has a very beautiful
and convenient library
and free Wi-Fi. Wi-Fi
works 24 hours a day in
the university, library
and dormitory.

I just wanted to celebrate this holiday! Because it was very nice, I was visiting a Polish family celebrating Christmas for the first time. We were asked beforehand which ingredients should not be placed on the table - this is a sign of respect.

Traveled and visited several cities and museums. Saw the Baltic Sea, the Colosseum and the Eiffel Tower
