

A photograph of a student's desk with a purple overlay. The desk contains a water bottle with a black and white striped sleeve, a jar of snacks, a pen holder with various pens and highlighters, and some papers. The text "Student's practice" is written in a white, italicized serif font on the purple background.

*Student's  
practice*

The background of the slide is a collage of educational and technological items. At the top, there is a solid purple rectangular bar. Below it, a world map is visible, with the continents highlighted in a light blue color. In the foreground, there is a white laptop, a spiral-bound notebook with a dark cover, and a silver pen. The text is overlaid on a semi-transparent white rectangular area in the center of the slide.

*According to EP 7M03110 - “International Relations”, the development and use of various scientific and pedagogical methods and innovative forms of teaching are provided for, and electronic educational and methodological literature, etc. are being introduced. At the same time, the master’s student has an active position in planning the educational process, i.e. he can spontaneously choose the sequence of study, combine its types in the ratio he needs, combine various blocks of information, while creating an individual educational space. Lecture classes are conducted using presentations, scientific reports, demonstrations, educational videos and subsequent discussion. Every year, a survey of employers (external stakeholders) is conducted regarding satisfaction with the quality of implementation of the EP, an example is the coordination of its content with employers who participate in determining the list of elective disciplines, providing practice bases, final assessment of graduates, and participation in annual fairs for graduates.*

The background of the slide is a collage of educational and professional items. At the top, there is a solid purple horizontal bar. Below it, a world map is visible, with a laptop keyboard and trackpad overlaid on it. To the left, there is a spiral-bound notebook, and to the right, a pen is partially visible. The text is centered in a white box with a light gray border.

*Research practice is an important part of the educational process. The knowledge and production experience gained during internship will allow future masters to make informed, competent and independent decisions when performing final qualification and scientific work. During the internship, students rely on the knowledge and skills acquired during all internships during the bachelor's course. Research practice is an integral type of research and practical work of students, aimed at expanding the theoretical and practical knowledge acquired in the learning process. Research practice is aimed at acquiring and improving practical skills, knowledge, abilities, general professional and universal competencies.”*

The background of the slide is a composite image. At the top, there is a solid purple horizontal bar. Below it, a world map is visible, with the continents highlighted in a light blue color. In the foreground, a silver laptop is open, and to its left, a dark grey spiral-bound notebook is partially visible. The overall aesthetic is clean and professional, suggesting a global or educational context.

*Research practice should be considered not only as a means of developing professional adaptation and skills, developing the cognitive and creative activity of future specialists, but also as a result of the formation of professional competencies, since due to its specificity it is most closely woven into social reality and serves as a link between the theoretical training of a master's student and his future independent activities. Planning and organizing practice at all stages ensures:- consistent expansion of the range of professional competencies and practical experience formed in students and their complication as they move from one stage of practice to another;- integrity of training of specialists to perform basic labor functions;- connection between practice and theoretical training*

The background of the slide is a collage of educational and travel-related items. At the top, there is a solid purple rectangular bar. Below it, a world map is visible, with the landmasses in a light blue color. In the foreground, there is a white laptop, a silver pen, and a spiral-bound notebook with a white cover and a grey spine. The text is overlaid on a semi-transparent white rectangular area in the center of the slide.

*From September 4 to October 10, 2nd year undergraduates of the department of “International Relations and International Law” visited the city of Turkestan, where they completed research practice within the framework of the academic mobility program of the International Kazakh-Turkish University. A. Yasawi. During the educational visit, our undergraduates took part in special lectures according to a bilaterally agreed plan, got acquainted with the experience used by the International Kazakh-Turkish University in the higher education system, with their own methods and techniques in higher education. In addition to the theoretical orientation of the practice, a practical direction was also planned. In accordance with this plan, our undergraduates visited the historical places of the city of Turkestan, and also carried out research work on scientific dissertations. During their internship, our undergraduates were awarded special certificates. I would like to wish the 2nd year master's students, who have overcome new frontiers in education and science, to continue to work hard for the benefit of science and not to get tired of working in the development of science in an independent country.*

The background of the slide is a collage of educational and professional items. At the top, there is a solid purple rectangular bar. Below it, a world map is visible, with the continents in a light blue color. In the foreground, there is a silver laptop, a dark grey spiral notebook, and a silver pen. The text is centered over the map and laptop area.

*Students of the Department of International Relations and International Law undergo industrial practice in leading international and domestic companies. As a first step to building a career in the industry, the company provides students with the opportunity to undergo industrial practice, during which they can reinforce their theoretical knowledge of the specialty with practical skills obtained in real production conditions, try their hand and learn more about their future profession. The experience gained can become the basis for a diploma thesis (project). During the internship, the student is assigned an experienced mentor who will help them adapt to the workplace. Students who have successfully proven themselves during this time will receive a job offer.*

The background of the slide is a composite image. At the top is a solid purple horizontal bar. Below it is a light blue world map. In the foreground, there is a white laptop and a silver pen. The text is overlaid on a semi-transparent white rectangular area.

*The internship programs are developed taking into account the profile of the educational program, the nature of the enterprise, institution, organization-object of the internship. The program of professional internship is agreed with the enterprises (institutions, organizations) defined as the bases of internships, and approved by the head of the educational institution. In accordance with the "Rules for the organization of dual training", approved by the order of the Minister of Education and Science of the Republic of Kazakhstan dated January 21, 2016 No. 50, the department provides theoretical training at the university and industrial training at enterprises. This is achieved by increasing the practical component of the educational process and conducting classes directly at the workplace. Due to the increased role of practical training, future specialists master industrial skills at the training stage.*
